# User

user@example.com · Bergen

## Experience

**Backend developer, Employer One AS** (2024-01 to present)

Built a PySpark batch job on AWS Glue that turns sensor readings into daily production reports. Wrote the AWS infrastructure in Terraform and the REST API in Python with FastAPI and PostgreSQL.

**Frontend developer, Employer Two AS** (2023-06 to 2023-12)

Built React and TypeScript screens for a shift-planning tool.

## Education

**Bachelor in information technology** (2020-08 to 2023-06)

## Projects

**java_project**: Reading-list web app with a Spring Boot REST API, a React front end and login with refresh tokens.

**cloud_project**: Budget-tracking API in a container on Azure, provisioned with Terraform. GitHub Actions runs the tests and deploys each merge.
